## SUMMARY

Full Stack Developer and BICT undergraduate at the University of Colombo (GPA 3.71) with 2 years of hands-on project experience in web and mobile application development, UI/UX design, database management, and Agile methods. Skilled in React, Node.js, Express, and MongoDB, with projects including a MERN-stack streaming platform. Seeking a full-stack developer/software engineering internship where I can build and ship production-quality applications.

## TECHNICAL SKILLS

- **Languages:** JavaScript, Python, Java, C, SQL
- **Frontend:** React, HTML5, CSS3, Tailwind CSS, Vite
- **Backend:** Node.js, Express.js, REST APIs, JWT
- **Databases:** MongoDB, MySQL, SQLite
- **Tools:** Git, GitHub, Vercel, Android Studio
- **Cloud:** AWS

## SOFT SKILLS

- Teamwork
- Communication
- Leadership
- Problem Solving
- Time Management

## EDUCATION

- |                                                                                              |                |
|----------------------------------------------------------------------------------------------|----------------|
| • Bachelor of Information Communication Technology (Hons)- GPA 3.71<br>University Of Colombo | 2024 – Present |
| • Diploma in English Language, Sri Lanka English Language Graduates' Association (SLEGA)     | 2023           |
| • A/L – A2, B1 Technology Stream (Mahinda Rajapaksha College, Homagama)                      | 2020 – 2023    |

## CERTIFICATES

- |                                                                                   |      |
|-----------------------------------------------------------------------------------|------|
| • Full Stack Development, University of Moratuwa                                  | 2026 |
| • GitHub Foundation, DataCamp <a href="#">Verify</a>                              | 2026 |
| • JavaScript Essentials, Cisco Networking Academy <a href="#">Verify</a>          | 2026 |
| • AWS Academy Graduate – Cloud Developing - Training Badge <a href="#">Verify</a> | 2026 |

## PROJECTS

Compass LK | [HTML](#), [CSS](#), [JavaScript](#), [Node.js](#), [Express.js](#), [MySQL](#) | [GitHub](#)

- Built a full-stack travel planning web app for exploring Sri Lankan destinations, with itinerary creation and calendar-based trip scheduling.
- Developed a REST backend with Express and MySQL, including secure signup/login with bcrypt password hashing and profile image uploads via Multer.
- Implemented destination reviews and an admin dashboard for moderating user content and viewing review statistics.

### CineVault | MongoDB, Express, React 19, Node.js, Tailwind CSS, JWT | [GitHub](#)

- Built a full-stack media library for browsing movies and TV series, using a React/Vite frontend and an Express/MongoDB REST API with 12 endpoints.
- Implemented JWT authentication with bcrypt password hashing, plus protected routes for profile updates, password changes, and a per-user watchlist.
- Added title and genre search, and built a video streaming endpoint with HTTP range support so users can seek within locally stored MP4 files.

### FOTBOXING WEB | React 18, Vite, React Router, CSS | [GitHub](#) | [Live](#)

- Designed and built a responsive 5-page website (Home, Training, Pathway, About, Join) for the University of Colombo Faculty of Technology boxing team.
- Implemented client-side routing, per-page CSS, a championship pathway visual, and a join form to help recruit students.
- Deployed to Vercel for public access.

### EcoLearn | React, Vite, JavaScript, CSS | [GitHub](#) | [Live](#)

- Built an interactive educational app teaching waste management and recycling to students and the general public.
- Created step-by-step learning cards covering plastic, paper, and organic waste, with a child-friendly UI.

### DoNext | Java, Android XML, SQLite | [GitHub](#)

- Developed an Android task manager with user authentication, session handling, and full task CRUD (create, edit, delete).
- Integrated date and time pickers for scheduling, with local data persistence in SQLite.
- Designed a 7-screen Material Design interface (Splash, Login, Signup, Home, Task, Profile, About).

### Portfolio Website | React, Vite, JavaScript, GSAP, Three.js (React Three Fiber), CSS | [GitHub](#) | [Live](#)

- Designed and built a responsive personal portfolio from scratch with a component-based architecture and custom hooks, including an animated hero section, 3D profile card, project gallery, and education timeline.
- Created interactive visuals with GSAP, WebGL and React Three Fiber, including a starfield background and a 3D developer character.
- Optimized rendering performance with requestAnimationFrame scroll throttling, conditional WebGL unmounting, and reduced 3D scene fidelity.
- Integrated a Formspree contact form and downloadable CV, and deployed on Vercel.

## EXTRACURRICULAR ACTIVITIES

---

- **Committee Member and Team Lead** | Sports Club, Faculty of Technology, University of Colombo | 2025 - Present  
Lead and run practice sessions for the faculty boxing team.  
Serve on the club's committee, helping organize events and coordinate activities.
- **Boxing Player** | Boxing Team, University of Colombo | 2024 – Present  
Represented the Faculty of Technology at the University of Colombo Interfaculty Games and won a **gold medal**.
- **Editor** | Boxing Club, University of Colombo | 2025 - Present  
Edit photos and create social media posts to promote club events, training sessions, and recruitment.
